HEXSTELLAR

MEDIA KIT

Brand guidelines · company facts · press assets

OCTOBER 2026 · HEXSTELLAR.COM/MEDIA-KIT

01 · COMPANY

Accurate language builds durable coverage.

Use the approved descriptions below without expanding a measured claim beyond its documented scope.

ONE-LINE DESCRIPTION

HexStellar develops Runtime acceleration technology to pursue more useful computation on existing hardware, with Cortex as its public beta.

OPERATOR · ZENITH FLOW INNOVATIONS LLC

CORTEX

Cortex is HexStellar’s public beta proof of concept, created by Brayon Pieske. SI (super intelligence) agents use its documented CLI and API to submit supported problems to company-managed CPU servers and inspect structured results, metrics, receipts, and assurance.

ENTERPRISE RUNTIME

Runtime is HexStellar’s implemented proprietary native acceleration technology for compatible computing workloads. Direct evaluation takes place locally, on site, in an air-gapped environment under an agreed protocol and NDA; commercial licensing is agreed separately.

STANDARD BOILERPLATE

HexStellar, operated by Zenith Flow Innovations LLC, develops proprietary native Runtime acceleration technology for compatible computing workloads. Founded and created by Brayon Pieske, its work pursues greater useful capacity, faster valid computation, and improved efficiency on existing hardware. Cortex is the existing public beta proof of concept: SI (super intelligence) agents use its documented CLI and API to submit supported problems to HexStellar-managed CPU servers and inspect structured results, metrics, receipts, and assurance. Direct Runtime evaluation is arranged locally, on site, in an air-gapped environment under an agreed protocol and NDA. Compatibility and measured benefits remain specific to each workload and environment.

02 · IDENTITY

One geometry. Two approved colors.

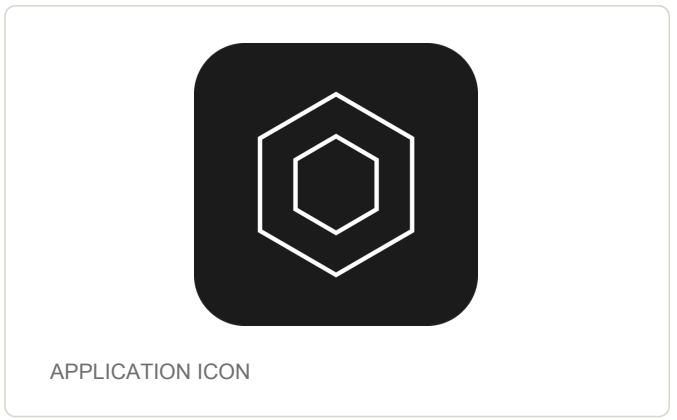

Use white on #1b1b1b and charcoal on white. The mark, wordmark, and stacked lockup are supplied in outlined SVG and transparent 4K PNG.

03 · USAGE

Protect recognition before decoration.

The official files are final artwork. Do not redraw the nested hexagons or reconstruct the display wordmark.

CLEAR SPACE

Minimum clear space: one inner-hexagon side on every edge.

MINIMUM SIZE

Standalone mark	Horizontal lockup
Digital · 24 px	Digital · 160 px
Print · 8 mm	Print · 45 mm

If the audience may not recognize HexStellar, use the horizontal lockup instead of the standalone mark.

DO

Use supplied files · preserve geometry and spacing · maintain high contrast · spell the accessible company name as HexStellar in prose, alt text, captions, and metadata.

DO NOT

Stretch, skew, rotate, crop, recolor, outline, animate, add effects, place the mark on a busy background, or imply partnership or endorsement without written approval.

04 · SYSTEM

Neutral structure. Precise emphasis.

HexStellar uses a disciplined neutral palette. Gold is a restrained interface accent and is never an approved logo color.

HEXSTELLAR CHARCOAL
#1B1B1B

WHITE
#FFFFFF

WARM SURFACE
#F6F5F2

ACCENT
#C9A84C

DISPLAY WORDMARK

HEXSTELLAR

Visual identity only. Do not substitute this spelling in prose or metadata.

ACCESSIBLE NAME

HexStellar

Use HexStellar in copy, alt text, metadata, filenames, and transcripts.

05 · DELIVERY

Everything needed for accurate coverage.

The complete ZIP includes logo families, social artwork, application icons, boilerplates, usage rules, this guide, and SHA-256 checksums.

PACKAGE INDEX

- logos/ · Mark, horizontal wordmark, and stacked lockup · SVG + transparent 4K PNG
- icons/ · Production application icon · SVG + 512 px + 192 px PNG
- social/ · Current 2400 × 1260 social and Open Graph card
- package/ · Brand guidelines, approved copy, usage rules, and checksums
